Rolling shutters with Single skin Profiles are integrated with glazing windows Optionally to provide visibility at eye level. can be customized with vision window up to full width & Height of Rolling Shutter.

And with Aluminium double skin PUF Insulated/Galvanized double skin PUF insulated profiles combine energy efficiency with structural Strength, Durability, acoustic Insulation, dust prevention & an overall aesthetic appeal.

OUR FACTORY

Types of Rolling Shutters

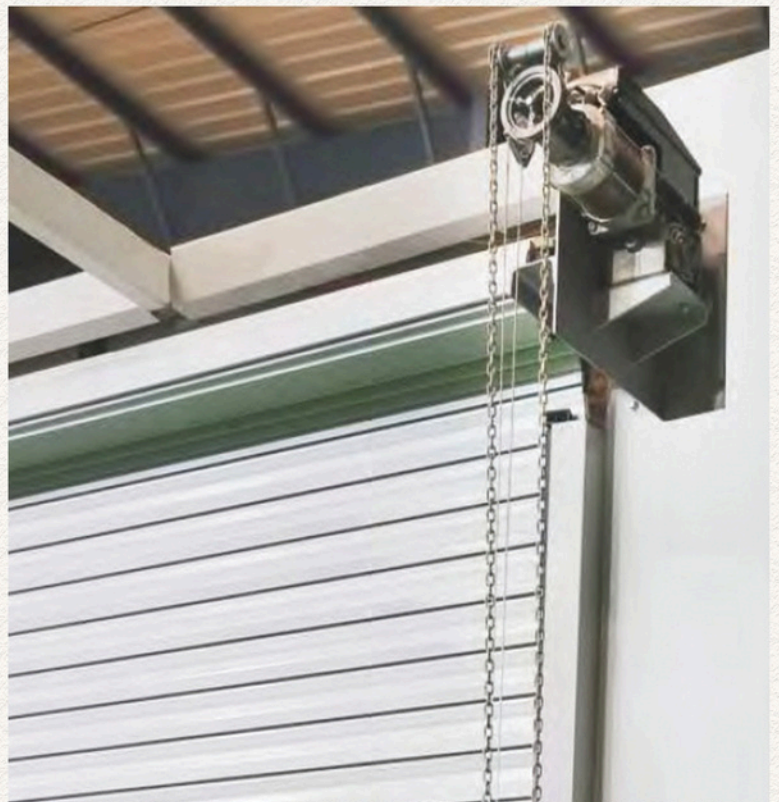

Gear - Operated Mechanical Rolling Shutters

Gear Type Rolling Shutters are operated mechanically by using a hand crank / winding handle. Counter balancing of the shutter curtain weight is done by using high tension coil type springs (made from special steel spring wire) within strong suspension shaft to reduce deflection. The gear operation is through machine cut worm gear. These Rolling Shutters are ideal for small to medium size.

Electrically Operated Rolling - Shutters

Electrical Type Rolling Shutters are operated by using a range of electrical actuators capable of operating shutters of all sizes. They are made up of self- braking worm gear with hollow shaft, integrated limit switches, integrated safety brakes with overload protection. Operationally, these shutters are relatively easy, hassle free and extremely safe and operate by integrating the control accessories like push-button, key selector or remote controls. During downtime, the option for manual operation is also available.

Rolling Shutters

The motorized, Gear operated, manual rolling shutter is the most popular and extensively utilized type of door among all the others. Our motorized rolling shutters are symbolic in that their rigid assembly is derived from the use of strong metals to form the guiding profile and slate. This component serves as a defense and barrier against hurricanes, damage, and theft. Our automatic rolling shutters are simple to use and guarantee customer satisfaction. Our state-of-the-art production facility, which can create 3000 rolling shutters in a month, is where we make our motorized rolling.

Automatic rolling shutters are designed with longevity and a trouble-free operation in mind. Additionally, the Motorized Rolling Shutters can be designed to meet the needs of the customer or to comply with IS6248. Our rolling shutters are all automatic, employing strong drive technology, and feature a manual override in the event of a power outage. They are also low decibel, dense, and noiseless. We are able to produce motorized rolling shutters with an infinite number of options to satisfy both functional and aesthetic requirements, up to a maximum width of 30,000 mm and height of 40,000 mm.

Types of Rolling Shutters we provide

- ✓ ALUMINUM ROLLING SHUTTERS
- ✓ GALVANISED ROLLING SHUTTERS
- ✓ STAINLESS STEEL ROLLING SHUTTERS
- ✓ STEEL BAR ROLLING GRILLS
- ✓ FIRE RATED ROLLING SHUTTERS

We fabricate our products precisely to your application and building opening. This applies to the selection of correct material profile, colour and the size. In this way you receive your perfect, completely individual solution. We are happy to advise you on specific application requirement. Our Rolling Shutters fit openings to a maximum width of 40,000 mm and height of 40,000 mm with an endless array of options to satisfy both aesthetic consideration as well as working requirement.

AUTOMATIC SLIDING GATES

VIGNESH Automation manufactures all kinds of Manual and Automatic gates according to the preference of the customer. Gates are mostly used to control the access of the people entering a facility into a secured area. We specialize in the fabrication of various types of Gates according to the preferred colour and material of the customer like Metal Gates, Stainless Steel Gates, and Aluminium Gates. The materials used for the manufacturing of the product are of the best quality, as we believe in delivering the best service to our customers.

Our gates can be used for residential, commercial, and industrial facilities. Customization of the Gate Design and colour scheming with an option of up to 200 RAL standards is offered. Complete installation of the Gates is done by our team of highly trained professionals. Automatic Gates offered by us are not only aesthetically designed on the exterior but are also mechanically best in the market with very smooth operation.

FIRE RATED DOORS
